Objective

As a recent graduate of Omaha Code School, I'm seeking a job that will allow me to grow in a direction utilizing my passions for visual design, user experience, and team management while continuing to develop my skills in back-end programming. My experience prior to this was managing and working collaboratively within groups of artists/creators to complete a project under budget and on deadline. I will bring that experience and flexibility with me into the field of software/technology. My goal is, within 5 years, to develop myself to lead a team of creative designers and developers that produces quality, inventive work.

Experience

Ensemble Member, BlueBarn's Witching Hour; Omaha, Nebraska 2006-2014

Worked collaboratively with the ensemble to create original theatre programming, 3 shows a year. Wrote scripts, did visual design, directed and managed projects. Volunteer, semi-professional work.

Server / Lead Wait, Vivace; Omaha, Nebraska – 2011-2014

Worked as part of a team, managed and led a team of servers, and constantly expanded my food/beverage knowledge-base in order to provide a superior customer service experience.

Lead Wait / Bartender, Jazz; Omaha, Nebraska – 2006-2011

Worked as part of a team, managed and led a team of servers, responsible for closing the bar. Like the above but less serious and more cajun.

Accolades

2015 Individual Artist Fellowship for Playwriting from the Nebraska Arts Council

Skills

- Ruby / Ruby on Rails
- Javascript / jQuery
- HTML / CSS
